

IQClick

Interactive Response System

With IQClick interactive response system, teachers can set questions quickly in class, and students could use student IQClick to answer questions quickly instead of writing or oral response.

Engage Every Student

With IQClick at hand, students are not passive listeners as before. Instead, they are active participants. IQClick enhances interactive learning in class by giving even the most timid students a voice.

Track Process Easily

With IQClick interactive response system, teachers can track progress through instant feedback to determine whether he/she need to do reviewing, re-teaching or go on with his/her following lesson.

Assess Student Understanding

Once students have responded to questions using student IQClick, the results are instantly viewed and analyzed in a pie chart or bar graph in IQ Interactive Education Platform Software. So, teachers can evaluate each student or group performance easily and quickly.

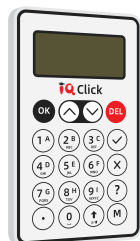

The image shows a large digital screen displaying the IQ Interactive Education Platform Software. At the top, there's an 'Answer' section with a grid of 24 red buttons numbered 1-24. Below this, a 'Single choice' question is displayed: 'NO.1 Which of the following figures is mitochondria? ()' with options A. 1, B. 2, C. 3, and D. 4. A diagram of a cell with various organelles is shown, with labels 1, 2, 3, and 4 pointing to different parts. A female teacher is standing to the right of the screen, and a young boy is in the foreground, holding an IQClick device and pointing at the screen. The software interface includes a 'Testing Response' section on the right showing a timer at 00:14 and response counts (Responded: 2, Unresponded: 22). A bottom toolbar contains various icons for navigation and editing.

Specification

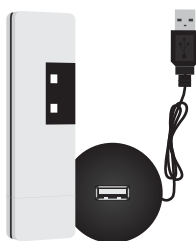

Model	IQClick FZ060
Standard Configuration	24/32/42 Student IQClicks
Overall Dimensions (L*W*H)	92*54*8mm
Communication Technology	Communication band 2.4GHz, patented and proprietary communication protocol, bidirectional data validation
Operating System	Windows 7/8/10
Operating Distance	360 degrees(100m with free space)
Max Devices Per System	Support max 8 controllers (200 students/controller), transmission is less than 0.01 seconds.
