

The background features a dark, starry space theme. On the left, a wireframe sphere is composed of numerous blue dots connected by thin lines. On the right, a bright blue light source at the center of a spiral emits a series of overlapping, semi-transparent rectangular frames that radiate outwards, creating a sense of depth and motion.

**RAPID
IPS** **1ms
GTG**

Rapid IPS display provides gamers with an ultra-fast 1ms GTG response time, which will significantly reduce monitor blur occurrence. The crystal clear image will certainly give you a competitive edge for precise decisions in fast-moving games.

	Conventional IPS	MSI Rapid IPS
Response time (Lower is better)	4ms~10ms (GtG)	Up to 1ms (GtG)
Viewing angle	178 degrees	178 degrees
Color Reproduction	Excellent	Excellent

**180**Hz **1**ms

180HZ REFRESH RATE +
1MS RESPONSE TIME

Equipped with a 180hz refresh rate and 1ms response time Rapid IPS panel, the monitor is optimized for fast-moving game genres such as first-person shooters, fighters, racing sims, real-time strategy, and sports. These games require fast and precise movements, and a monitor with a high refresh rate and fast response time will give you the edge over your competition.

Perfection For Any Refresh Rate

msi

Challenge any game without screen tearing, stuttering, flicker, or artifacts. G-SYNC compatible dynamically matches the refresh rate of the display to the frame rate of the GPU.

Also, since G-Sync compatible is not a hardware solution which means the AMD GPU users can also activate FreeSync.

Due to a certification issue, we only can promote G-Sync on the website but it 100% supports VRR for both brands' users.

FROM EDGE TO EDGE

With a super narrow bezel, enjoy the best immersion possible in the latest games with a multi-monitor 180 degree setup. Enjoy better continuity between screens while playing games, working, or general computing.

178°

178 DEGREES OF
WIDE VIEWING ANGLE

By having a large viewing angle, MSI gaming monitors has more leeway for placing your monitor in your setup without giving up the optimal viewing experience. Colors and details will stay sharp at more angles compared to other monitors with less viewing angles.

See Clearly in the Dark

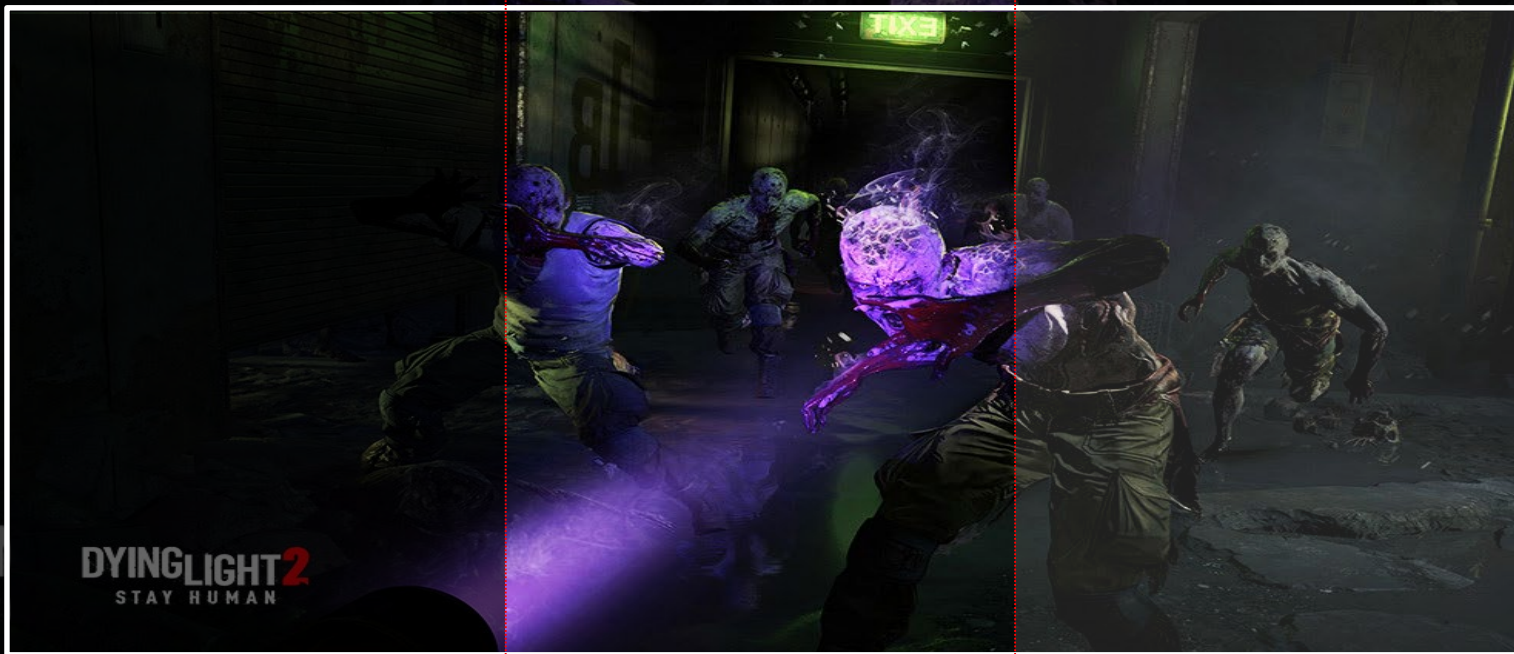

Whether your entire screen is dark, or just a few portions have heavy shadows. Let the world's first smart black tuner brighten your day by bringing out the fine details in dark areas.

Normal - Hardly see

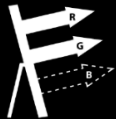

Night Vision

Black Tuner - Over exposed

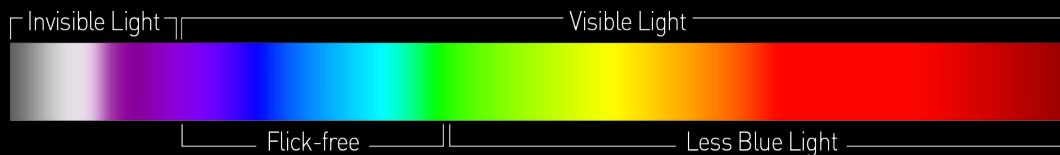

Less Blue Light

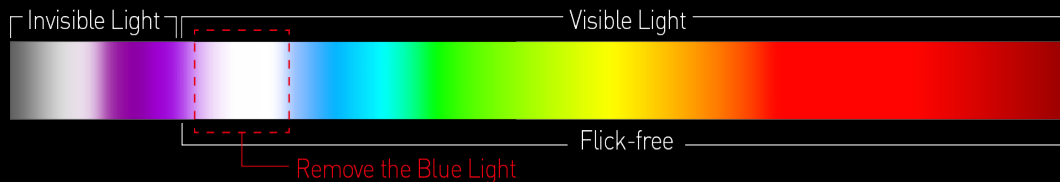

MSI gaming monitors are optimized to reduce eye strain by lowering the total amount of blue light, ensuring you a longer period of game time without fatigue.

GENERAL LCD

MSI Monitor

Anti-Flicker Technology

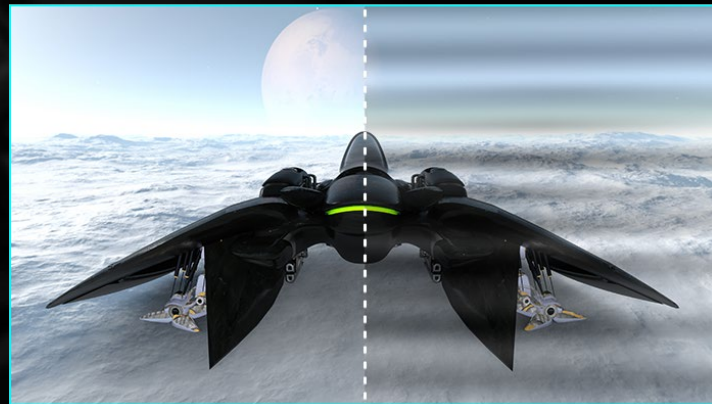

msi

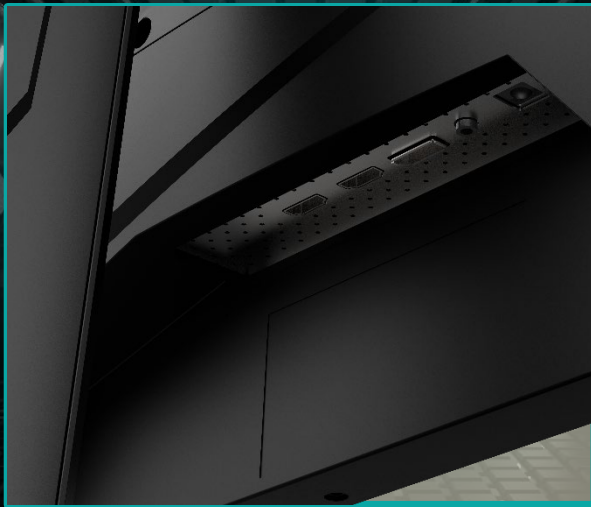

Generic monitor displays normally have a flicker-rate of about 200-times per second, which is unnoticeable to the naked eye, but can cause fatigue over time. MSI Anti-Flicker technology provides a very comfortable viewing experience by reducing the amount of flicker.

ANTI-FLICKER

WITHOUT ANTI-FLICKER

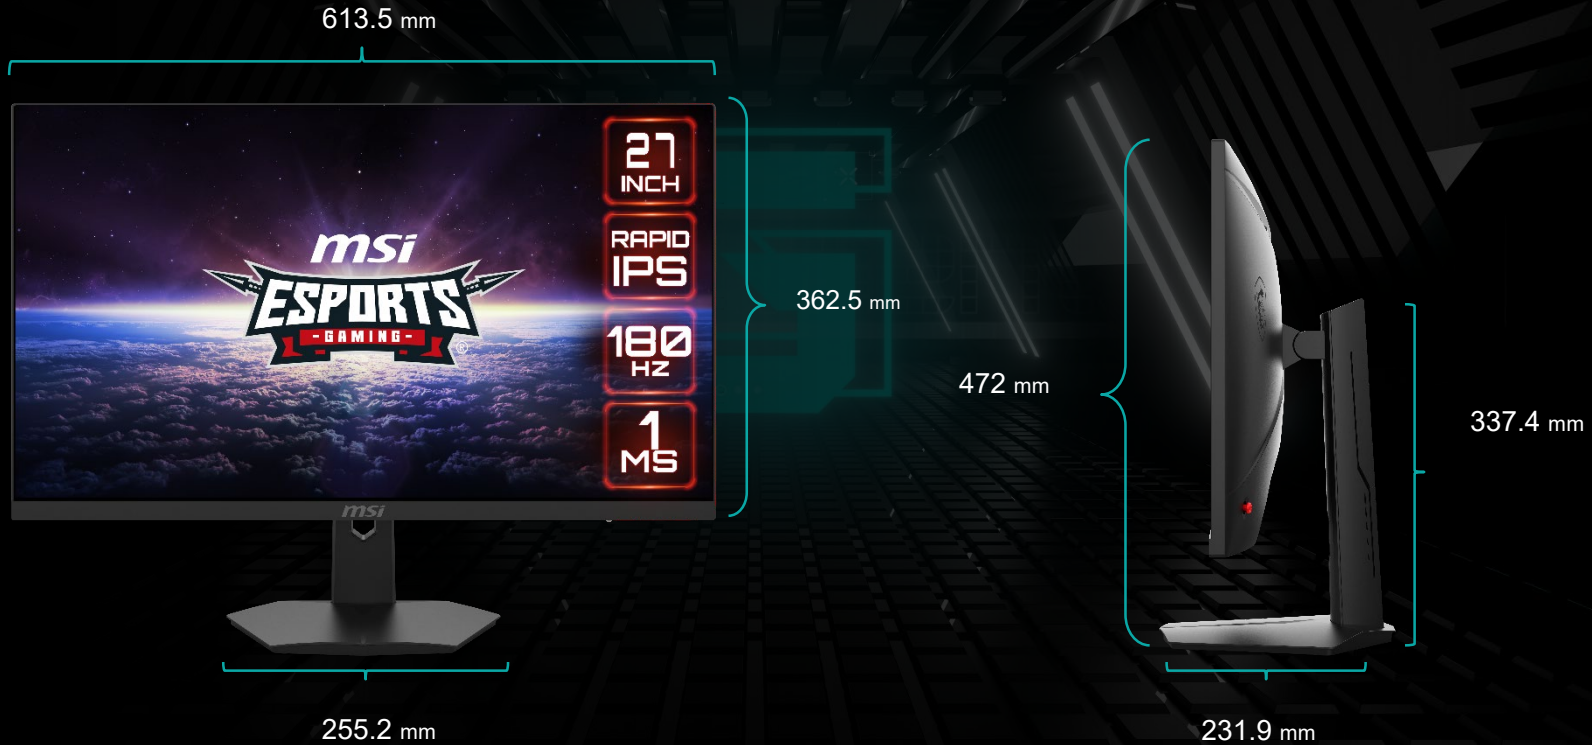

Unique design

The exterior of the MSI G274F features a unique industrial design style that unfolds its crafted surface finishing.
