ELECTRIC TROLLEY

QUICK OVERVIEW

Electric Trolley is powered by an electric motor and ideal for maxi screens (up to 90").

DETAILS

Electric Trolley is powered by an electric motor and ideal for maxi screens (up to 90"). The electric movement allows for an excursion of 50cm to reach a maximum height of 129cm (measurement taken from the center of the screen) mounted on 4 swivel castors with brakes on a wide, anti-tilt base (110cm x 71 cm). Its articulated framework allows it to be folded in a minimum space (81cm). Furthermore, it's equipped with a security system which blocks the ascent movement in the presence of an obstacle. It then automatically returns to its initial position.

ADDITIONAL INFORMATION

Product code	06184	ON REQUEST MIN VESA 300x200 - MAX VESA 800X600
VIDEO size	46" - 90" 117 - 228 cm	
Weight capacity	150kg max. 330 lbs max.	
Easy Hanging System	YES	
Hidden Cable	YES	
With Wheels	YES	
Product Video	electric trolley b2 ENG
